Re: CZARA we don't expect extension to be a big deal – we are already a month behind due to shutdown (proposal was a month after SA deadline) so postponing it by a month was a foregone conclusion. With comments, in particular NWEAs, which are in the gigabyte range, we will need more time to consider.

Only if asked: bottom line is that based on info we have from the state disapproval is likely based on Forestry MM, but full analysis of OR's submittal is needed before that conclusion is made.

Re: Oregon: how long an extension will NOAA/EPA need to seek? Any sense as to whether that's going to be a big deal?

Oregon CZARA Program

On March 21st the public comment period closed on the proposed decision to find that OR has not submitted an approvable Coastal NPS program. 75 sets of comments were submitted, pro and con, some of them quite substantial. March 21st was also the deadline for OR to make a final submittal to EPA and NOAA on the remaining management measures (OSDS, new development, Forestry) for consideration in the agencies' final decision.

According to the terms of the settlement agreement this decision is to be made by May 15th – an extension of that deadline will need to be negotiated.
